

This action may severely hurt a station I listen too in my area called KLOVE. While I am not familiar with the exact FCC ID and the FM frequency is preset I think its 106.7 in my area. Anyway, this station serves my community by allowing local charities and churches to post information about non-profit events for free. It also serves the Christian community in my area since we have few to no other choices in our area for that type of programming. Please do not pass this proceeding as I feel it will do more harm then good in my community.
